I am a graduate in Computer Engineering from Gujarat Technological University. Aiming to leverage proven teamwork, communication and problem-solving skills to successfully fill the given role at the company. Frequently praised as hard-working by my peers. I can be relied upon to help your company achieve its goals. I believe and am confident that my academic scores will be compensated with good programming skills.

PERSONAL PROJECTS

Face recognition based attendance system [Python-Opencv framework] (06/2019 - 05/2020)

- The software first captures an image of all the authorized persons and stores the information into database. Next time whenever the registered person enters the premises the system recognizes the person and marks his attendance along with the time. And also generate monthly report and inform students and it's parents via mail.
